

Remix by Via

Documentation of Unique Functionality and Features

Via is the sole owner of Remix. Remix is available exclusively through Via, and cannot be procured from any other vendor, reseller, or distributor.

The Remix platform is the only provider of integrated transportation planning software that connects flexible data analysis with network development, planning and scheduling, and street design, enabling transportation professionals with the complete mobility toolkit. Remix enables authorities to strategically design and analyze the best transportation options for their community. More than 17,000 transportation professionals around the world use Remix to make data-driven decisions and build consensus with key stakeholders and members of the public to shape the future of transportation.

Transportation data lives in different formats, systems, and silos. Remix brings critical datasets from disparate sources together into a unified view so you can understand existing conditions and gain insights across many dimensions.

With Remix's flexible and robust data analysis capabilities, the Remix platform is the only transportation software specifically designed to help professionals integrate equity analysis into all workflows. Remix is built on, and champions, open data standards, making us uniquely positioned to work within an agency's existing processes, and minimizes an organization's risk for vendor lock-in, maximizing the potential for collaboration. Remix is the first and only collaborative mapping platform made to be used by multiple departments across a diverse set of stakeholders and, unlike other technology offerings, is intentionally designed for community engagement.

Remix is cloud-based and provides an unlimited number of user accounts within a customer organization, providing the flexibility to use Remix at home offices, team meetings, or stakeholder outreach, as well as access to the most-up-to-date version of Remix without hidden update fees or costly en-premise installation and maintenance. Remix is updated continuously based on customer feedback and research; over the last year and a half, the product development team launched over 150 improvements and new features to the platform. Remix's best-in-class software is paired with Remix's expert customer success team, a team of consultants and transportation professionals to support the long-term success of our clients' transportation programs and projects. Each customer organization is

assigned a dedicated Customer Success Manager, ready to ensure an organization is thriving from the moment it becomes a customer. When an organization procures Remix, they don't just procure technology — they procure transportation expertise, influence in software innovation, and access to Remix's large network of planning professionals.
